

Total Analysis Report

<b>Sample Name</b>	Metal Hair Clip	<b>Test Time</b>	200	
<b>Supplier</b>	Simply faBOWlous	<b>Voltage</b>	45	
<b>Operator</b>	swc	<b>Current</b>	400	
<b>Test Date</b>	1/30/2009	<b>WorkCurve</b>	PEPb011309	
<b>Element</b>		<b>Content(ppm)</b>	<b>Error(ppm)</b>	
<b>Element of drawing</b>				
				
Remarks: ND represents a value of <10ppm with an error of 5ppm.				
XRF tests on surface only.				

Disclaimer/Limit of Liability- Test Results are provided to customer based on test areas specified by them. Test was conducted in most cases on finished goods. This may or may not be the best sample type. EAR takes care in preparing the sample for testing, limitations on result accuracy could be caused by sample type. Uncertainty is stated as an expected range and should be considered when determining largest potential result when deciding compliance. Eastern Applied Research limits their liability to the amount paid for testing.
